PURPOSE AND PRINCIPLES

01

OUR VISION

Always to provide reliable and professional services to major customers and to fulfil their diverse needs in a flexible and secure manner.

02

OUR MISSION

To provide goods and services to the Oil & Gas industries using engineering and logistics best industrial best practices while protecting the environment.

OUR CORE VALUES

● PEOPLE

● INTEGRITY

● EXCELLENCE

● TRANSFORMATION

● CUSTOMER FOCUS

● INNOVATION

● PERFORMANCE

● CONSISTENCY

HEALTH, SAFETY AND ENVIRONMENT

In order to implement the company's Environmental Policy, fulfil the commitments established in the Policy and achieve environmental objectives, SHOSHOS has implemented a high standard Environmental Management System (EMS).

The implemented EMS is helping SHOSHOS to achieve its ultimate environmental goals, which are minimizing the impacts of the company's operations on the environment and avoiding any damages/losses and/or potential harms to the environment.

SHOSHOS endeavors to protect local communities, heritage and wildlife, taking into account legal requirements, local community's environmental requirements and other concerns.

The aim is to be recognized by the company's environmental excellence among drilling, marine, construction, logistic, procurement, installation and well service companies and to achieve its environmental goals.

THE GOALS ARE TO PERFORM OPERATIONS AND SUPPLY SERVICES

- Without environmental incidents
- Without statutory environmental liabilities
- In an environmentally friendly manner

SHOSHOS is properly equipped and capable to perform onshore and offshore operations under the requirements of Zero-Pollution. According to increased international concern on environment, SHOSHOS gives effort in environmental protection.

A proper waste management plan begins with pollution prevention. During the performance of operations, all generated waste is properly managed in order to minimize its potential to cause harm to the environment.

A PROMISE OF QUALITY

DIRECTOR'S MESSAGE

BUILDING LASTING PARTNERSHIPS

It's a great honour to have our Corporate Profile in your hands!

SHOSHOS OIL & GAS INT'L LTD is an onshore and offshore drilling and well services company. SHOSHOS provides services for some of the Nation's most recognized operators and consistently exceeds its clients' expectations by providing record drilling, Well Intervention, Marine, Construction, Installation, Logistics, Procurement, General Engineering and Completion Services.

Furthermore, the company's presence is expanded in its regions of focus, entering new strategic markets and continually upgrading, to provide the best overall sales and services to its clients. SHOSHOS has established partnerships and has built up relationships with other leading contractors to ensure access to new technologies and to provide an extensive upgrading program.

Quality, health, safety and environment (QHSE) are highly prioritized and demonstrated through continually achieved improvements in the company's results and records.

We see you as a support partner to our growth and advancement in the industry. Doing business with us is an everlasting promise of quality. We promise to exceed your positive expectation on our service delivery.

THANK YOU

WELL INTERVENTION SERVICE

- Workovers
- Well testing services
- Cementing & stimulation services
- Well logging
- Slickline
- Coil tubing & nitrogen
- Directional drilling services
- Mud services
- Fishing services
- H2S services
- Tubular & running
- Inspection of the lifting equipment
- Well control equipment services
- Tubular inspection service
- Downhole equipment services
- Rig floor equipment services

MAINTENANCE

SHOSHOS provides corrective and preventive maintenance for drilling and workover rigs (onshore and offshore), and further provides well services equipment, process machinery equipment, electric and electronic equipment and oil tools. These services were developed for the requirements of SHOSHOS OIL & GAS INT'L LIMITED needs, as well as for other clients.

- Process machinery services
- Preventive maintenance system
- Energetics services
- Oil industry equipment reconstruction and upgrade
- Development of construction and maintenance projects for equipment and facilities
- Supervision, consulting and project management
- Preventive maintenance computerized system management
- Ex-proof equipment maintenance & periodic inspections
- Service and overhaul of the drilling and workover rigs and all types of drilling/workover/well service equipment and tools

SUPPLY CHAIN

LOGISTICS & PROCUREMENT

SHOSHOS participates excellently in the comprehensive Supply Chain Management Services in the areas of Procurement and Supply of Technical materials from anywhere in the world to any plant in Nigeria. We handle all logistics for timely delivery of equipment and spare parts from the OEM to the end-user's warehouse.

WE PROCURE ALL OIL AND GAS RELATED GOODS

- Power turbine
- Pumps
- Compressors
- Generator

PUMP APPLICATIONS

We supply, install and maintain pumps that fit your applications and requirements, such as fire water pumps, waste water pumps, dosing pumps, etc.

COMPRESSION SYSTEMS

For reciprocating and centrifugal compressors, we supply spare parts such as couplings, internals, unloaders, bearings, etc.

EMD DIESEL ENGINES

Heavy duty two and four stroke diesel engines for marine, traction, compression and power generation applications.

FABRICATION & MAINTENANCE

SHOSHOS specializes in providing high quality standard and custom metal welding and fabrication to a broad spectrum of industries. Our company offers a solid roster of repeat customers and our welding procedures are certified to recognised International Standards.

INDUSTRIAL WELDING

Our industrial welding services include but are not limited to structural frames, tanks modification and maintenance, access platforms, stairs, industrial railings as well as on-site support. We also offer construction and renovation support.

SHOSHOS is also recognised in pipeline welding and installation with over 20 weld procedures. We can work on carbon steel, aluminum, chrome, austenitic and ferrite stainless steel pipes in any diameter and wall thickness while complying with ASME B31.3, ANSI, CSA, AWS and CWB codes.

MACHINE SHOP SERVICES

We offer machine shop services in collaboration with our strategic partners with an equipped workshop to cater for the needs of our clients. Specific services include precision CNC and manual machining, fabrication, surface grinding, prototyping, contract measuring, threading and boring, custom die forming, sawing, shearing, product welding and assembly, etc.

- Cold cutting services
- Bolt torquing and tensioning services
- Skids/modules
- Sand blasting, painting and specialist coating services

ONSHORE AND OFFSHORE DELIVERY

ONSHORE/OFFSHORE PIPELINE LAYING AND PIGGING

SHOSHOS provides comprehensive engineering, procurement, construction and installation of oil and gas flexible pipelines in offshore, swamp, shallow water and onshore locations.

Our expertise spans the full range of oil & gas pipelines, EPC, installation and maintenance capabilities including fabrication, installation, pipeline integrity, pipeline pigging, repairs and upgrades, fabrication and installation of pump and metering stations, valve replacement and related services. We also undertake pipeline repairs, clamping and wrapping services.

We undertake pipeline projects of up to 48-inch diameter in shallow waters, swamp and onshore locations. Our highly skilled personnel, technical partnerships and fleet of modern equipment give us the capability to meet and exceed expectations.

- Tank farm

MOORING SYSTEMS SERVICES

SHOSHOS and her technical partners not only install and maintain mooring systems for drilling rigs, drill ships, semisubmersibles, floating production systems and oil barges, but also provide a complete inventory of mooring components for sale, rent or rent-purchase.

This includes complete mooring systems, high holding anchors, large diameter chain, chase and extension wires, high capacity spooling units and inspected connections. Recovery and deployment of these mooring systems is performed by SHOSHOS's highly experienced professional anchor handling crews.

- Vessel/heavy equipment
- Risers and subsea umbilicals installations
- Project management

CONSTRUCTION & RENTALS

CONSTRUCTION

- Pipeline / production facilities construction
- Mechanical construction
- All oil & gas facilities & maintenance

EQUIPMENT AND TOOLS RENTALS

SHOSHOS has a wide range of welding, fabrication and support equipment for lease. Our inventory includes

- Welding machines and accessories
- Air compressors
- Bolt tension equipment
- Cold cutters and explosion proof lights
- Pumps and boosters
- Portacabin
- Tower lights, etc

ENGINEERING & PRODUCT MARKETING

ENGINEERING

- Chemical Engineering
- Mechanical Engineering
- Petroleum Engineering
- Civil Engineering
- Subsea Engineering

PETROLEUM PRODUCT MARKETING

SHOSHOS manages supply, trading and logistics for a wide range of products, including refined petro chemicals, feedstocks and road construction products, distributed and sold through our marketing system. Our Trading department markets natural gas to wholesale and large consumers, such as utility and industrial customers and pipeline operators. SHOSHOS aim is to rank among the leading marketers of natural gas in Nigeria.

- Premium motor spirit (PMS or petrol)
- Automotive Gas Oil (AGO or diesel)
- Household Kerosene (HHK)
- Aviation Turbine Kerosene (ATK or Jet-A1)
- Industry fuel
- High pour Fuel Oil (HPFO)
- Low pour Fuel Oil (LPFO)

- Liquefied Petroleum Gas (LPG)
- Bitumen
- Base oil

OFFSHORE SUPPORT

MARINE SERVICES

Oil & Gas drives our economy. Energy derived from it lights homes, fuels vehicles and powers industries. Getting that energy to consumers is one thing, providing upstream supply and support services for the exploration, development and extraction processes is another. SHOSHOS meets those needs by integrating every individual customer's upstream supply chain requirements with bespoke logistics solutions.

SHOSHOS specializes in marine logistics and support services, with tailored expertise and a proven track record in the offshore oil and gas energy industries.

- Transportation to offshore platforms
- Transportation of offshore jackets
- Transportation of piles and bridges
- Logistics support for commissioning offshore oil and gas platforms
- Transportation of pipe-laying equipment
- Logistic support for pipe-laying operations
- Maintenance of offshore oil and gas platforms
- Logistics support for the decommissioning of offshore oil and gas platforms
- Management of supply bases
- Tug and barge operator
- Construction of all types of barges

LAYING, PIGGING & MOORING

ONSHORE/OFFSHORE PIPELINE LAYING AND PIGGING

SHOSHOS provides comprehensive engineering, procurement, construction and installation of oil and gas flexible pipelines in offshore, swamp, shallow water and onshore locations.

Our expertise spans the full range of oil & gas pipelines, EPC, installation and maintenance capabilities including fabrication, installation, pipeline integrity, pipeline pigging, repairs and upgrades, fabrication and installation of pump and metering stations, valve replacement and related services. We also undertake pipeline repairs, clamping and wrapping services.

We undertake pipeline projects of up to 48-inch diameter in shallow waters, swamp and onshore locations. Our highly skilled personnel, technical partnerships and fleet of modern equipment give us the capability to meet and exceed expectations.

MOORING SYSTEMS SERVICES

SHOSHOS and her technical partners not only install and maintain mooring systems for drilling rigs, drill ships, semisubmersibles, floating production systems and oil barges, but also provide a complete inventory of mooring components for sale, rent or rent-purchase.

This includes complete mooring systems, high holding anchors, large diameter chain, chase and extension wires, high capacity spooling units and inspected connections. Recovery and deployment is performed by SHOSHOS's highly experienced professional anchor handling crews.

PIPELINE REINFORCEMENT & LEAK REPAIRS

SHOSHOS carries out the following pipe repairs and maintenance

- Permanent repair of corroded pipelines under pressure ranging from 4 to 56 inches
- Temporary repair of leaks under low and high pressure, up to 80 bars, ranging from 4 to 56 inches without a shutdown
- Reinforcement, repair and maintenance of damaged pipes and preventive coating
- Corrosion control, surface preparation and treatment of metals, vessels, separators, pipes and structural members
- Pipe defect surveys with our REA software using finite element simulations and calculations

PIPE MATE & FLANGE FIT

PIPE MATE PIPE REINFORCEMENT SLEEVE

SHOSHOS uses pipe sleeves to reinforce non-leaking, weakened, dented or damaged pipeline while the line remains on stream. Supplied for any specified pressure, wall thickness and class. Supplied in various lengths and materials as specified by the client.

FLANGE FIT FLANGE REPAIR CLAMP

Stops leaks in flange gaskets. Flange Fit Repair Rings are designed for easy installation. No special surface preparation is required prior to installation.

Bolt leakage is stopped by the injection of a suitable sealant fluid via sufficient injection sockets. In case of a small gap between the line flanges, gaskets can be installed for temporary sealing prior to and during injection.

TEMPORARY STOPKIT INSTALLATION
PERMANENT STOPKIT INSTALLATION
